

I oppose any movement to lower the current standards of tv and radio. I do not believe we should allow nudity and profanity on the air even for brief or "fleeting" periods of time. This is a terrible idea. By lowering the standards of television and radio we will put our children's integrity on the line. What kind of society have we become that we do not care for the safety of the integrity and minds of CHILDREN?! There are already channels where such things are available. Please keep them there and do not let it leak into the channels that children will be watching. I completely oppose this movement. It would not serve the public in any way.
